ABOUT VASI

Vietnam Association for Supporting Industries (VASI) is a non-governmental and non-profit organization representing manufacturing enterprises and supporting industries in Vietnam. Currently, VASI has 220 members who are mainly manufacturing enterprises in molds and fixtures, automation system, metal working, electrical & electronics components, plastic & rubber components, materials, and software solutions. Most of our members' products are provided for multinational companies in Vietnam as well as exported to Japan, Korea, North America, and Europe.

VASI regularly offers capacity building training and coaching courses to our members. We support our members with business matching activities to global buyers. We also host forums and seminars, conduct market research, survey and provide data on manufacturing industries for interested stakeholders. VASI is a trusted and dedicated partner of governmental and international organizations in the area of industrial development, such as Ministry of Industry and Trade (MOIT), Ministry of Planning and Investment (MPI), Ministry of Science and Technology (MOST), the European Union, the World Bank Group and International Finance Corporation (IFC), Japan International Cooperation Agency (JICA), and the Netherlands Center for the Promotion of Imports from developing countries (CBI).

In Yearbook 2018, we provide the information of 178 Vietnamese enterprises, consisting of three sectors: Metal processing, Electric & Electronic, and Plastic & Rubber. They are among the best companies supplying to manufacturing network of multinational corporations in Vietnam and in the world. We hope that you could find some new faces in the manufacturing supporting industries in Vietnam. Especially in this book, we are pleased to review the recent policy of the Government regarding the incentives to invest in Vietnam supporting industries as a special priority sector. We sincerely hope you enjoy this Yearbook and find it useful.

Truong Thi Chi Binh, PhD. in Economics
Vice President, General Secretary
Vietnam Association for Supporting Industries

- **Established year:** 2012
- **Number of permanent employees:** 82
- **Turnover:** 22 million USD
- **Standards:** ISO 9001:2008
- **Main products:** High precision plastic injection molds, rubber molds, aluminium die casting molds; High precision plastic injection parts; High precision engineering and machining spare parts
- **Main technology and equipments:** CNC Milling machine (4 units); EDM Milling machine (4 units); CNC wire cut machine (2 units); CNC Turn Mill 4+1 axis machine (1 unit); Plastic injection machine (6 units)
- **Main customers:** Mitany Sangyo Co., Ltd.; Gulf Rubber Australia PTY Ltd.; Toho Vietnam; ITO Corporation; Mitsuba M-Tech Vietnam; Selectrona GMBH
- **Export experience:** Australia; Germany; New Zealand

CNS Amura Precision Co.,Ltd (CAP) is a joint- venture company invested by Saigon Industry Incorporation and Singapore. Our company specializes in high precision rubber, plastic injection molds and aluminium die casting molds. We have a laser welding and can perform modification service. Our products are mainly used in automotive, telecommunication, computer, electronic and medical equipment. Our team is made up of experienced managers, well-trained engineers and dedicated workers are willing to meet customers' diverse demands and high expectation. Besides new modern precise machines from famous brands, such as Makino, Sumitomo, Mazak, Sodik, Mitsubishi, etc., we also invest in 3D mold design software NX CAD/CAM from Siemen, we aim to become one of the best precision engineering company in Vietnam for delivering highest quality products and excellent customer service.

Cosmos is a metal parts manufacturing company. Main production lines are focused on manufacturing motorcycle parts, construction parts, general metal processing. With full machines, we can produce various types of metal work such as sheet metal forming (pressing, bending, lathe, cutting) as long as welding and other CNC processing. In addition, our strengths are designing and manufacturing pressing molds and welding jigs, checking jigs. With 10 years experience with Japanese customers in Vietnam, we now have a stable quality system and we look forward to serve the international customers.

Pursuant to the law on value-added tax No. 13/2008/QH12 and the Law No. 31/2013/QH13 amending, supplementing a number of Articles of the Law on enterprise income tax;

Pursuant to the Law on enterprise income tax No. 14/2008/QH12 and the Law No. 32/2013/QH13 amending, supplementing a number of Articles of the Law on enterprise income tax;

Pursuant to the Law No. 71/2014/QH13 amending, supplementing a number of Articles of the law on tax;

Pursuant to the Decree No. 83/2013/ND-CP dated July 22, 2013, detailing a number of articles of the Law on Tax Administration and the Law Amending and Supplementing a Number of Articles of the Law on Tax Administration;

Pursuant to the Decree No. 209/2013/ND-CP dated December 18, 2013 detailing and guiding a number of articles of the Law on Value-Added Tax;

Pursuant to the Decree No. 218/2013/ND-CP dated December 26, 2013 detailing and guiding the implementation of the Law on Enterprise Income Tax;

Pursuant to the Decree No. 12/2015/ND-CP dated February 12, 2015 detailing the implementation of the Law Amending and Supplementing a Number of Articles of the Tax Laws and amending and supplementing a number of articles of the decrees on taxes;

Pursuant to the Decree No. 215/2013/ND-CP dated December 23, 2013 of the Government defining the functions, tasks, powers and organizational structure of the Ministry of Finance;

Pursuant to the Decree No. 111/2015/ND-CP dated November 03, 2015 on development of supporting industries;

At the proposal of the General Director of Tax Department,

The Minister of Finance guides on declaration of value-added tax and incentives on enterprise income tax for projects manufacturing supporting industry products in Vietnam as follows:

Article 1. Scope of application

This Circular guides on declaration of value-added tax and incentives on enterprise income tax for projects manufacturing supporting industry products on the list of products of supporting industries prioritized for development as stipulated under the Decree No. 111/2015/ND-CP dated November 03, 2015 on development of supporting industries.

Article 2. Subjects of application

1. Organizations, individuals manufacturing supporting industry products on the list of products of supporting industries prioritized for development in the territory of Vietnam.

2. Tax department and related organizations, individuals.

Article 3. Declaration of value-added tax

1. Declaration of value-added tax

- For tax payers being organizations

Tax payers shall declare value-added tax by quarter for income of supporting industry products on the list of products of supporting industries prioritized for development (regardless of income being under 50 billion dong or more).

If income of tax payers come from both income of supporting industry products on the list of products of supporting industries prioritized for development and income of other business operation, tax payers shall also declare value-added tax by quarter. If not declaring by quarter, tax payers may declare value-added tax by month and notify to the tax department as stipulated under the law on tax management.

- Tax payers being individuals that have income arising from supporting industry products on the list of products of supporting industries prioritized for development shall declare value-added tax by year and submit value-added tax by quarter. If paying tax by each time arising income of supporting industry products on the list of products of supporting industries prioritized for development, tax payers shall declare and submit value-added tax by each arising time or may declare and submit value-added tax by month.

2. Dossier for tax declaration

- Tax declaration dossier for tax payers being organizations shall be implemented according to guidelines under the Circular No. 156/2013/TT-BTC dated November 06, 2013, the Circular No. 26/2015/TT-BTC dated February 27, 2015 of the Ministry of Finance.

- Tax declaration dossier for tax payers being individuals shall be implemented according to guidelines under the Circular No. 92/2015/TT-BTC dated June 15, 2015 of the Ministry of Finance.

Article 4. Incentives on enterprise income tax

Incentives on enterprise income tax shall apply for income from implementing projects manufacturing supporting industry products on the list of products of supporting industries prioritized for development from January 01, 2015 meeting conditions as stipulated under the Law No. 71/2014/QH13 dated November 26, 2014 and other guidelines documents, being granted the incentives certificate on manufacturing supporting industry products by relevant agencies.

Orders, procedures of certifying incentives and examination of incentives for projects manufacturing supporting industry products on the list of products of supporting industries prioritized for development shall implement according to regulations under the Circular No. 55/2015/TT-BTC dated December 30, 2015 of the Ministry of Industry and Trade.

The incentives certificate on manufacturing supporting industry products on the list of products of supporting industries prioritized for development is the base to apply incentives on enterprise income tax. Rate of incentives and time of application, transitional incentives shall be implemented according to the law on enterprise income tax.

Example 1:

In the tax calculation period 2015, Enterprise A is granted the investment registration certificate to implement projects of manufacturing supporting industry products. In the tax calculation period 2016, project's income arises from production of supporting industry products. In the tax calculation period 2017, the project is granted the incentive certificate on manufacturing supporting industry products. In the tax calculation period 2018, project's income arises from production of supporting industry products. Time for calculation of incentives of enterprise income tax for the above project is as follows: 2017 is the first year to apply incentives tax, 2018 is the first year to enjoy tax-free if actually meeting conditions on incentive policy as stipulated.

Example 2:

In the tax calculation 2016, Enterprise B is granted the investment registration certificate to implement new projects manufacturing supporting industry products. In the tax calculation 2017, project's income arises from production of supporting industry products. In the tax calculation 2018, project's income arises from production of supporting industry products. In the tax calculation 2019, the project is granted the incentive certificate on manufacturing supporting industry products. Time for calculation of incentives on enterprise income tax for the above project is as follows: 2019 is the first year to apply incentives rate, 2019 is the first year to enjoy tax-free if actually meeting conditions on incentive policy as stipulated.

During the time of enjoying incentives on enterprise income tax if enterprises implement production activities, enterprises shall determine income from projects manufacturing supporting industry products on the list of products of supporting industries prioritized for development to enjoy incentives on enterprise income tax as stipulated.

Article 5. Effect

1. This Circular takes effect from April 01, 2016. Incentives of enterprise income tax as stipulated under this Circular shall apply for the period of enterprise income tax from 2015.

2. Tax department at all levels shall guide organizations, individuals implementing this Circular.

3. Organizations, individuals under the subjects of application of this Circular shall implement according to guidelines of this Circular.

Any problems arising in the course of implementation should be reported to the Ministry of Finance for consideration and settlement.

For the Minister
The Deputy Ministry
Do Hoang Anh Tuan

Annex Attached with Decree No. 111/2015/ND-CP dated November 03 2015 by Government:

LIST OF INCENTIVES SUPPORTING INDUSTRY PRODUCTS

I. TEXTILE & GARMENT INDUSTRY

- Natural fiber: cotton, silk, jute, hemp fiber;
- Synthetic fiber: PE, Viscose;
- Knitting yarn, woven yarn, polyester high tenacity yarn, nylon high tenacity yarn, spandex yarn;
- Fabric: technical fabric, non-woven and woven fabric, knitted fabric;
- Sewing threads for textile and garment;
- Chemicals, auxiliary chemicals, fabric dyes;
- Accessories: buttons, zippers, mex.

II. FOOTWEAR – LEATHER INDUSTRY

- Leather;
- Leatherette;
- Shoe soles, shoelace, toe shoe;
- Chemicals used in leather tanning;
- Salty leather;
- Sewing thread for shoe;
- Shoe goo, decorative accessories.

III. ELECTRONICS INDUSTRY

- Basic electronics –optoelectronics components; transistors, integrated circuits, sensors , resistors , capacitors , diodes , antennas , thyristor;
- Quartz components;
- IC;
- Material used for manufacturing electronic components, Semi-conductors, hard magnetic materials, active insulators;
- Electronic products components; plastic components, rubber components, glass components and mechanical-electronic components;
- Laptop battery and cell phone battery;
- Wires, cables, LED light bulbs, headphones and speakers;
- Cell phone battery chargers;
- Screens.

IV. AUTOMOBILE INDUSTRY

- Engine and engine components: piston, crankshaft, connecting rod , gear , exhaust , cylinder , cylinder head assembly kits , camshaft , rings, engine valves;
- Lubrication system: oil filters, coolers, radiators, oil pumps and valves;
- Cooling system: radiators, thermostat valves, water pumps, air cooling fans;
- Fuel supply system: fuel tanks, fuel filter;
- Frame – hull – door: punch –late-shaped components, trunk, chassis, doors, doorstep;
- Suspension system: Tweezers, springs, dampers;
- Wheels: Tires, aluminum rims;
- Transmission system: clutch, gearbox, axles, propeller shaft;
- Driving system;
- Braking system;
- Electric – Electronic components:
- Power supply: Generators, accumulators;
- Ignition system: spark plug, high voltage transformer;
- + Starter relay, electric starter;
- + Wires, connectors, fuses, sensors, automatic control devices, processors;
- Lighting system and signals: indicators, horns, gauges;
- Automobile exhaust treatment system;
- Plastic components;
- Rubber components, buffering material;
- Windshields, wiper blades, seats.

V. MECHANICAL FABRICATION SECTOR

- Molds, fixtures: processing fixtures, testing fixtures, stamping molds, casting molds;
- Tools - cutters: drill, turning cutters, milling cutters;
- Mechanical processing components and accessories, welders;
- Components and accessories of shipping building, agricultural machines and driving machines;
- Components, equipment and accessories for processing agriculture, forestry, aquaculture and salt;
- Measurement devices: rulers, 3D - coordinate measuring machines, metal analyzers, ultrasonic welding machines;
- Other machine components: high-strength bolts, high tensile fasteners, bearings, silver lining, valves, joints, punch plates, variable speed boxes, hydraulic cylinders;
- Fabricated steel.

VI. SUPPORTING PRODUCTS USED IN HI-TECH INDUSTRY

- Types of mold: high precision molds, high precision mold for plastic casting;
- High standard mechanical parts: types of nuts, bolts, screws and high - precision equipment used in electronics, mechanical electronic parts, medical electronics, industrial robots;
- Types of electronic components, electronic circuits used for creating equipment: Peripheral equipment, computers, electronic appliances, audiovisual equipment, solar cells, microprocessors, controllers (programmable logic controllers PLC, CNC, etc.);
- Components and accessories used for new power generator and renewable generator;
- High quality plastic components: high precision drive train, durable, heat-resistant and wear-resistant plastic components;
- Types of sensors: air sensor, acceleration sensors, magnetic sensors, biological sensors, temperature sensors, moisture sensors, light sensors, pressure sensors;
- New generation engines: electric motors, magnetic motors, servo motors, reluctance motors, linear motors.
