Deep preferential trade agreements and
upgrading in global value chains:
the case of Vietnam

The German Development Institute / Deutsches Institut für Entwicklungspolitik (DIE) is a multidisciplinary research, policy advice and training institute for Germany's bilateral and multilateral development cooperation. On the basis of independent research, it acts as consultant to public institutions in Germany and abroad on current issues of cooperation between developed and developing countries. Through its nine-month training course, the German Development Institute prepares German and European university graduates for careers in the field of development policy.

Dr Axel Berger is a Senior Researcher at the German Development Institute / Deutsches Institut für Entwicklungspolitik (DIE) in Bonn and works in the Department for World Economy and Development Financing on topics in trade and development.

This report is the outcome of a collaborative research project conducted in the framework of the 51st Postgraduate Training Programme at the German Development Institute / Deutsches Institut für Entwicklungspolitik (DIE) in close cooperation with the Central Institute for Economic Management (CIEM) and the WTO Center of the Vietnam Chamber of Commerce and Industry (VCCI). At CIEM, we immensely benefitted from the overall guidance of Vo Tri Thanh and the generous support of Tran Binh Minh and Pham Tien Hoang during three months of field research in Vietnam. The joint business survey of DIE and VCCI would not have been possible without the support of Nguyen Thi Thu Trang, Nguyen Thi Thuy Dung and their team. We are grateful for the input, advice and critique we received at different stages of the report's conceptualisation and drafting from a number of colleagues, among them, Tilman Altenburg, Fabian Bohnenberger, Lisa Brahms, Clara Brandi, Dao Ngoc Tien, Lidija Christmann, Javier Revilla Diez, Claudio Dordi, Aimée Hampel-Milagrosa, Juliana Kliesch, Phan Le, Alexandros Ragoussis, Sonja Schirmbeck, Evita Schmieg, Hubert Schmitz, Jakob Schwab, Erwin Schweißhelm, Stefanie Sörensen, Tieu Dung Tien, Jörg Wischermann and Peter Wolff. We also benefitted from valuable support from our research assistants Dennis Appenfeller and Daniel Siejak. Last but not the least, we would like to thank our interview partners who shared their insights and knowledge in the understanding that their identities would remain anonymous. Funding from the German Federal Ministry for Economic Cooperation and Development (BMZ) is gratefully acknowledged. The responsibility for all remaining errors lies with the authors.

Executive summary	1
1 Introduction	7
2 Literature review	11
2.1 The expansion of GVCs	11
2.2 The proliferation of deep PTAs	18
2.3 The relationship between GVCs and deep PTAs	20
3 The case of Vietnam	22
3.1 Vietnam's current economic situation	22
3.2 Vietnam's PTA network	23
4 Research methodology	27
5 The big picture: upgrading in Vietnam and the role of PTAs	29
5.1 Obstacles to upgrading	30
5.2 How deep PTAs address obstacles to and policies for upgrading	36
6 Back to the roots: upgrading in T&G through strict rules of origin?	46
6.1 Rules of origin as an incentive for functional upgrading	50
6.2 Conditions to meet and make best use of the rules of origin	57
7 Off to new horizons: new PTA disciplines as momentum for upgrading in E&E?	62
7.1 Product and process upgrading through linkages with FDI	64
7.2 Conditions to realise and benefit from linkages	73
8 Policy implications and lessons learnt	77
9 Conclusion	82
